

SAT[®] School Day Is Coming to Your School

Thanks to special funding, the globally recognized college entrance exam — the SAT[®] — will be offered to you and other eligible students on a regular school day at your school.

The SAT is one of the best ways to show colleges your knowledge and skills, and now you have the chance to take it in a familiar setting.

The SAT is more than an admission test.

- The SAT provides free college planning resources that help you choose and apply to colleges that fit you best.
- The SAT connects you to scholarships and merit aid to help you pay for college.
- If you opt in to the Student Search Service[®] when you register for the SAT, you'll hear from colleges, universities, and scholarship programs looking for students just like you.

Soon you will have the opportunity to complete your registration for the Oct. 14 SAT and select colleges or universities to receive your scores. SAT School Day also allows you to use The Official SAT Online Course[™] for free (a \$34.95 value) while you practice for test day.
